# company

Permanent make-up is a great responsibility, so we are constantly looking for even better solutions. Thanks to our experience, BIODERMALOGIC has a reputation for reliability and the highest quality. Each of our satisfied clients is our best recommendation. We work every day to fulfil your expectations. Thank you for the trust you have placed in us.

# BIODERM

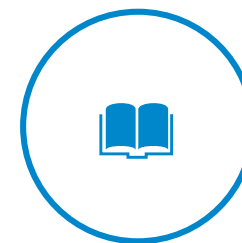

## concept

SAFETY and THE HIGHEST QUALITY are our fundamental criteria. Permanent make-up leaves no room for compromises. BIODERMALOGIC's equipment features the highest precision, achieved through cutting-edge technologies and top-quality materials. Our permanent make-up devices meet all European quality standards.

## safety

The permanent make-up procedure involves epidermal breakdown and contact with blood. Our patented needle-cartridge system, with an internal membrane protecting from secondary infection, and an array of disposable accessories, make the procedure safe both for the client and the technician. When it comes to safety, we do not accept any compromises.

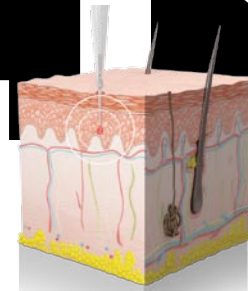

## training

Knowledge and experience. We offer our own training programs on permanent make-up and microneedle mesotherapy. Our courses are run by experienced trainers who combine theoretical knowledge with years of practical experience. In light of the great responsibility associated with permanent make-up procedures, we invite you to continue broadening your knowledge and skills during our training sessions and seminars.

## NEEDLE-CARTRIDGE HEALTH AND SAFETY

Cartridge - integrated needle system with the attachment of a cartridge that guarantees the highest standards in hygienic safety. The inner membrane keeps the needle completely sterile and clean while it protects against pigment or blood flow back into the hand piece. Simultaneously, it protects the needle from contamination during client procedure use. In order to meet safety requirements, all disposable cartridges are additionally sterilised with ethylene oxide.

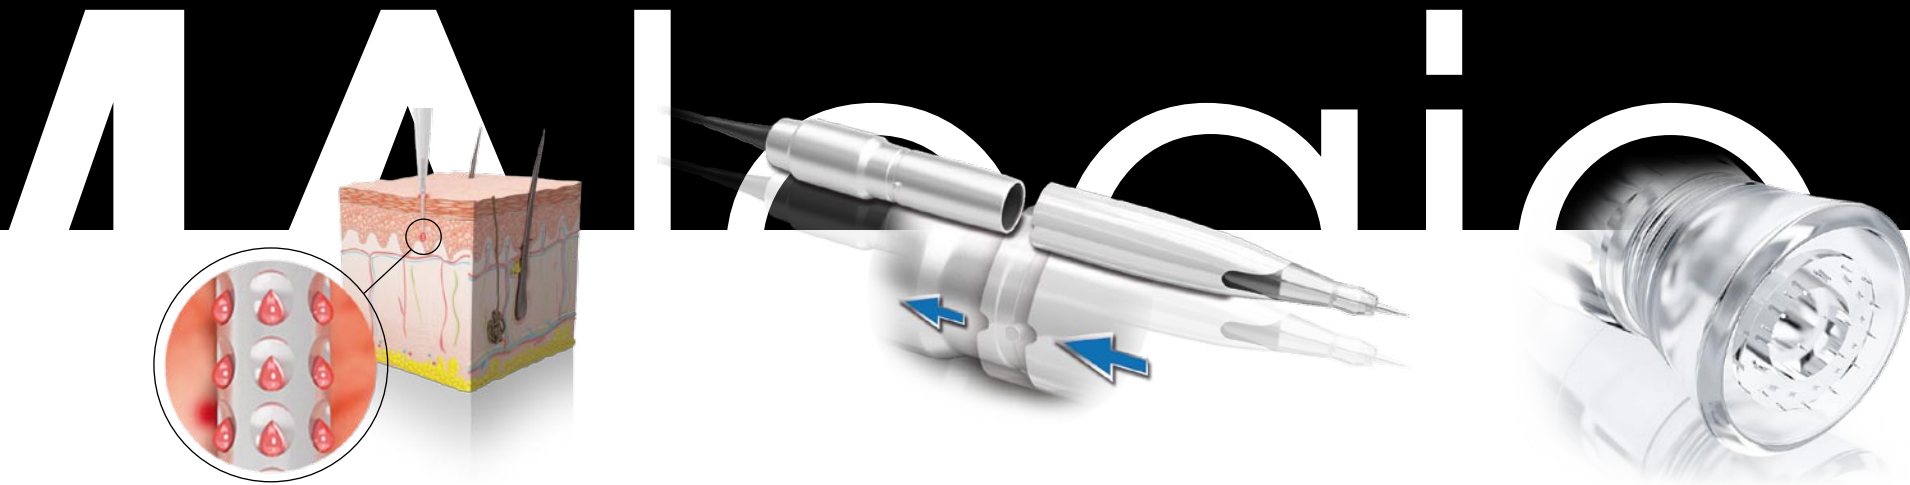

## SPEED AND POWER LESS TRAUMA

Now, thanks to its innovative Viva Digital - BIODERMALOGIC® employs higher frequencies and a greater force. Skin damage and bleeding is greatly reduced. A microprocessor control ensures the needle depth and power are maintained at the correct levels irrespective of the physical characteristics of the skin. As a result, more colour remains in the epidermis and dermis and the time for the skin to heal itself is greatly reduced.

# Technology

technology • beauty • professionalism

## **MORE COLOUR**

### **A NEEDLE WITH HOLLOW**

In the BIODERMALOGIC - ELITE cartridge system, the surface of the needle is engraved with hollows which act as microreservoirs for the colour. These ensure that the colour is precisely delivered to the right levels of the epidermis and dermis and a much greater and richer colour density is achieved.

## **CLICK-IN**

### **COMFORT AND HYGIENE**

The Click-In system enables quick assembly of the cartridge. It easily allows changing the size of the needles or the colour of pigments during use. The disposable, ergonomic cartridge is designed to shield most of the handle. That protects it from contamination, making the procedure even safer.

## **PERFECT FIT**

### **MESO CARTRIDGE**

The plate with microneedles is convex and flexible, owing to which its surface adjusts to the shape of the treated areas and easily reaches other areas which are normally difficult to get to. Meso Biodermalogic cartridges enable effective perforation of the epidermal layer (epidermis) and owing to the created micropunctures, makes it possible to introduce active substances with larger molecules into the dermis layer in a painless manner. Normally, it is not possible for such molecules to permeate so deep down into the skin.

# Needle-cartridge

**permanent mak-up**  
system

Biodermalogic has developed and patented the first integrated needle system with the attachment of a cartridge that guarantees the highest standards in hygienic safety. The inner membrane keeps the needle completely sterile and clean while it protects against dye or blood flow back into the hand piece. Simultaneously, it protects the needle from contamination during client procedure use. In order to meet safety requirements, all disposable cartridges are packed in an ISO class 8 cleanroom, and they are additionally sterilised with ethylene oxide, an individual lot number is assigned to each cartridge.

When the needle cartridge is detached - the needle, is guided automatically, retracts into the hand piece. This prevents any accidental puncturing by the needle and also prevents the possibility of a viral infection being caused, subsequently, the onset of some dangerous diseases such as HIV or hepatitis.

The shape of the needle was optimally designed in order to obtain the highest precision and offers minimum discomfort while implanting dyes into the skin.

# Pigments inorganic

technology • beauty • professionalism

Colour changes in the skin may be the result of an immunological reaction. For this reason it is sometimes necessary to repeat the process to make a small colour adjustment. However, this should never result in the colour of a treated area changing to pink, orange or green. Such drastic colour changes can be the result of using poor quality pigments or the incorrect placement of the colours by means of a too deep or too shallow application. No colours exist which can give a full guarantee of colour stability and therefore its not possible to always know how an individuals immunological reaction may be after the procedure. The careful formulation of Biodermalogic colours reduces the possibility of colour changes to a minimum.

• expect more

PERMANENT MAKE-UP & MESO SYSTEM

IN THE SKIN

COLOUR CHANGES

The colours for Biodermalogic's permanent makeup have been manufactured in accordance with all European Union conformities. A team of Doctors, Biochemists and Permanent Make-up Specialists developed our colour formulations, observing above all else to the SAFETY FIRST. Ingredients of the highest quality are used to ensure that the pigments are naturally accepted by the skin and become evenly distributed and maintain their colour intensity long-term. Our unique and dermatology-tested formula (by the independent Dermatest® laboratory) minimises the possibility of an allergic reaction. During the production process for Biodermalogic colours we only work to the standards defined in KVO (cosmetic standards) and GMP (Good Manufacturing Practice). We take a very conservative approach to the principles of safety which is why we only use pharmaceutical grade ingredients in accordance with the EU cosmetic directive (EU resolution ResAP 2008/1). Biodermalogic colours do not contain any toxic dyes, heavy metals or aromatic amines.

Biodermalogic colours have been created in accordance with three main principles: colour saturation, a long life of the pigment in the skin and safety. For us at Biodermalogic safety is the most important. Unfortunately many pigments which offer a high degree of colour saturation are dangerous, that is why we do not use them in formulating Biodermalogic colours. We ensure colour saturation and the longevity of our colours by using a high concentration of pigments.

Many companies offer colours which do not conform to European Union regulations. The consequences of introducing toxic or microbiologically impure pigments into our bodies can be very dangerous. Biodermalogic offers a full range of colours with an appropriate safety guarantees.

BIOSTIMULATIVE LASER

Biostimulative laser (class 2, wave length 650 nm and power < 1 mW) minimises the possible occurrence of blisters after treatment and stimulates the healing process.

CONTROL PEN

Helps to check how evenly the colour has been dispersed in the skin. Especially useful when defining eyebrows.

MIXING PEN

The mixing pen with its sterile felt tips can be used in several ways:  
1. it can thoroughly mix the colours in their containers  
2. it can make a preliminary mark up before applying permanent make-up. By using the colour which will be used in the procedure the possibility of felt tip pen colours entering the skin is eliminated.

microneedle mesotherapy  
system

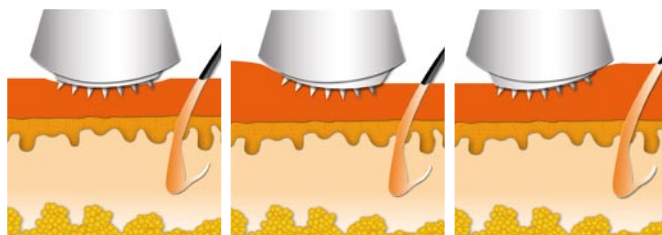

Meso Biodermalogic cartridges are equipped with a plate incorporating 18 microneedles which puncture the skin in a delicate manner. There are also 13 openings on the surface of the plate which allow an unobstructed flow of Meso Biodermalogic active substances.

Microneedles are 0.5 mm long, which makes it possible to puncture the skin up to the depth of 0.3 mm. Micropunctures do not affect the blood system, owing to this, the Meso Biodermalogic treatment can therefore be performed not only by aesthetic medical clinics but also by cosmetologists and beauticians.

• expect more

PERMANENT MAKE-UP & MESO SYSTEM

The plate with microneedles is convex and flexible, owing to which its surface adjusts to the shape of the treated areas and easily reaches other areas which are normally difficult to get to. Meso Biodermalogic cartridges enable effective perforation of the epidermal layer (epidermis) and owing to the created micropunctures, makes it possible to introduce active substances with larger molecules into the dermis layer in a painless manner. Normally, it is not possible for such molecules to permeate so deep down into the skin.

01

**Eye  
Make-up  
Remover**

The product removes make-up from the eye and eyelid areas gently and thoroughly. It is suitable for contact lens wearers and for sensitive eyes. It has a liquid consistency and does not feel oily or heavy on the skin. It has an excellent moisturizing effect and reduces lymphatic swelling and dark circles under the eyes. It relieves and soothes with minimum signs of eye fatigue and makes the eyes feel clean and fresh. The product contains:

- eyebright extract – has a soothing, anti-inflammatory and regenerating effect
- panthenol – moisturizes the skin and relieves irritation and inflammation.

280 ml

Dermatologically tested.  
For professional use only.

**Ingredients:** Aqua, Pentylene Glycol, Glycerin, Glyceryl Polyacrylate, Euphrasia Officinalis Extract, PEG-40 Hydrogenated Castor Oil, Cetyl PEG/PPG-10/1 Dimethicone, Panthenol, Dehydroacetic Acid, Benzyl Alcohol, Citric Acid.

02

**Cleansing Gel  
Make-up  
Remover  
for Sensitive Skin**

A gentle cleansing gel designed for normal and mixed skin, including sensitive and skin prone to irritation. It cleanses the skin gently and effectively of make-up, impurities and excess sebum. The gel contains active ingredients that regulate the sebaceous glands thus reducing the oiliness of the skin and does not tighten or dry the skin. After using the gel the skin is left feeling clean, smooth and fresh. The formula is enriched with:

- sepicontrolTMA5 - extract from the bark of cinnamon, restricts and regulates the secretion of sebum and the bacterial flora of the skin
- extracts from the roots of licorice and astragalus - an anti-inflammatory, soothing. It improves the tone and oxygenation of cells, reducing redness and irritations
- panthenol - soothing, enhances the healing of the skin.

500 ml

Dermatologically tested.  
For professional use only.

**Ingredients:** Aqua, Decyl Glucoside, Cocamidopropyl Betaine, Sodium Laureth Sulfate, Glycerin, Panthenol, Astragalus Membranaceus Root Extract, Glycyrrhiza Glabra Root Extract, Capryloyl Glycine, Sarcosine, Cinnamomum Zeylanicum Bark Ext., Sodium Acrylates /C10-30 Alkyl Acrylate Crosspolymer, Phenoxyethanol, Ethylhexylglycerin, CI 42090, Parfum.

03

**Sensitive  
Skin  
Tonic**

Alcohol-free tonic for normal and combination skin prone to sensitivity and irritation. Its active ingredients normalize the function of the sebaceous glands and reduce oiliness. The tonic tones well, moisturizes and soothes hyperreactive skin. It does not cause an elasticity sensation or excessive dryness. It leaves the skin feeling delicate, fresh and subtly lighter. The tonic contains:

- sepicontrol™ A5 – cinnamon bark extract; controls sebum secretion and regulates bacterial skin flora
- astragalus root extract – has a soothing and anti-inflammatory effect; inhibits negative cell reactions to stress.

500 ml

Dermatologically tested.  
For professional use only.

**Ingredients:** Aqua, Glycerin, Caprylyl/Capryl Glucoside, Capryloyl Glycine, Sarcosine, Cinnamomum Zeylanicum Bark Extract, Astragalus Membranaceus Root Extract, Sodium Benzoate, Potassium Sorbate, Xanthan Gum, Parfum.

04

## AHA Peeling

Emulsion gel exfoliant with AHA fruit acids. It is recommended for all skin types, including sensitive and couperose skin. It is easy to spread on the skin and does not cause redness or irritation. It moisturizes and makes the skin feel smoother, as well as improving skin tone and adds radiance visibly improving the overall skin condition, preparing the skin for the absorption of active compounds and leaving the skin feeling smooth, lighter and soft to the touch. The peeling contains:

- alpha hydroxy acids derived from fruits – peel off dead cells of the horny layer of the epidermis; lightens and makes the skin smooth
- cranberry extract – a rich source of vitamin C; strengthens capillaries; subtly lightens the skin and adds radiance to the complexion.

200 ml

Dermatologically tested.  
For professional use only.

**Ingredients:** Aqua, Sodium Lactate, Lactic Acid, Propylene Glycol, Cetearyl Alcohol, Petrolatum, Dibutyl Adipate, Cetearith-20, Cetearith-12, Dimethicone, Vaccinium Macrocarpon Fruit Extract, Dehydroacetic Acid, Benzyl Alcohol, Sodium Acrylates/C10-30 Alkyl Acrylate Crosspolymer, Parfum, CI 16255.

05A

## Hyaluronic Moisturizing Serum with trehalose

Gel for micro needle and needle-free mesotherapy and ultrasonic peeling. Recommended for all skin types, especially dry and dehydrated skin, with no age restrictions. Contains complex active substances that effectively and permanently bind water in the epidermis. Reduces the roughness of the skin due to its dryness, overcomes moisture deficiency and protects the skin against dehydration and accelerated ageing. Ideally moisturised the skin becomes soft, smooth and supple.

Active ingredients:

trehalose (a natural disaccharide - moisturises, slows the loss of water from the skin and protects the skin from the negative effects of external factors), hyaluronic acid and sodium hyaluronate (deeply moisturise and bind water in the skin and reduce superficial wrinkles caused by over dry skin), liquorice extract (has antioxidant, bacteriostatic, anti-allergic, and anti-inflammatory properties, also protects against UV radiation), white tea extract (neutralises free radicals and protects the skin against photoaging), pullulan (a glucan which protects the immune system and moisturises the skin).

Properties:

- effectively and permanently binds water in the skin
- reduces dryness and roughness of the skin
- reduces surface wrinkles caused by desiccation
- protects skin from dehydration and irritation
- leaves skin soft and smooth.

30 ml

Dermatologically tested.  
For professional use only.

**Ingredients:** Aqua, Glycerin, Pentylene Glycol, Propylene Glycol, Trehalose, Pullulan, Sodium Hyaluronate, Hyaluronic Acid, Sodium Dehydroacetate, Glycyrrhiza Glabra Root Ext., Camellia Sinensis Leaf Extr., Sodium Acrylate/Sodium Acryloyldimethyl Taurate Copolymer, Isohexadecane, Polysorbate 80, Polysorbate 20.

05B

## Regenerating and Oxygenating Serum with coenzyme Q10 and vitamin P2

Gel for micro needle and needle-free mesotherapy, and also ultrasonic peeling. It has oxygenating, regenerating and anti-edema properties. Unique active ingredients oxygenate tired skin, improve blood microcirculation and cell metabolism. Effectively eliminate edema and lymphatic stasis. Skin becomes smooth and regains a natural, healthy colour. recommended for under-oxygenated, matte, dull, skin.

Active ingredients:

hesperidin (Vitamin P2 - improves improving microcirculation of lymph flow, normalises vascular permeability, relaxes them and reduces swelling), coenzyme Q10 (a powerful antioxidant and stimulator of cell life processes, such as energy and oxygen exchange), pullulan (regenerates and hydrates the skin), tocotrienols (powerful antioxidants, protect the skin from the destructive effects of free radicals and photoaging).

Properties:

- oxygenates tired skin
- improves blood microcirculation and cellular metabolism
- reduces swelling and lymphatic stasis
- moisturises, regenerates and protects against photoaging
- skin becomes smooth and radiant with a healthy colour.

30 ml

Dermatologically tested.  
For professional use only.

**Ingredients:** Aqua, Glycerin, Pentylene Glycol, Propylene Glycol, Pullulan, Hesperidin Methyl Chalcone, Ubiquinone, Tocotrienols, Sodium Acrylate/Sodium Acryloyldimethyl Taurate Copolymer, Isohexadecane, Polysorbate 80, Polysorbate 20, Vitis Vinifera Seed Oil.

## Couperose Skin Serum with vitamin C and rutin

Gel for micro needle and needle-free mesotherapy, and also ultrasonic peeling. Recommended for skin with vascular lesions and the initial phase of acne rosacea. Brightens erythema, reduces the swelling caused by increased permeability of blood vessels, and protects them from bursting. Reduces red colouration in the skin, lightens its colour and accelerates the reduction of inflammation.

### Active ingredients:

extract of chestnut and witch-hazel (softens and strengthens blood vessels, has anti-inflammatory, astringent and anti edema properties, reduces erythema and telangiectasias), white tea extract (neutralises free radicals and protects the skin from photoaging), rutin (a flavonoid, protects against free radicals and strengthens blood vessels), pullulan (a glucan – regenerates and hydrates the skin), ascorbyl glucoside (a stabilised form of vitamin C – an excellent antioxidant, supports microcirculation of the blood, delicately lightens skin and stimulates the synthesis of collagen).

### Properties:

- strengthens and seals blood vessels
- reduces erythema, telangiectasias and swelling
- accelerates the resolution of inflammation
- moisturises, regenerates and lightens the complexion
- protects against photoaging and free radicals.

30 ml

Dermatologically tested.  
For professional use only.

**Ingredients:** Aqua, Glycerin, Pentylene Glycol, Propylene Glycol, Sodium Acrylate/Sodium Acryloyldimethyl Taurate Copolymer, Pullulan, Ascorbyl Glucoside, Camellia Sinensis Leaf Ext., Aesculus Hippocastanum Seed Ext., Hamamelis Virginiana Bark Ext., Rutin, Isohexadecane, Polysorbate 80, Polysorbate 20.

## Wrinkle Lifting Serum with amino peptides

Gel for micro needle and needle-free mesotherapy and ultrasonic peeling. Recommended for all types of mature skin, from 45 years onwards. Small active amino acids sequences ensure excellent transepidermal penetration enabling them to act in the dermis and mucous basal. There is a significant increase in the synthesis of collagen types I, IV, XVII and VII. Clinical studies show a reduction in all types of wrinkles, a firming and moisturising effect on the skin and an increase in its 'density'. Lines and wrinkles are gradually smoothed out and the skin becomes firmer and tighter.

### Active ingredients:

peptides (SYN@COLL and SYN@-TACKS – stimulate fibroblasts for the synthesis of collagen, elastin and glycosaminoglycans and improve intercellular communication), yam extract and root cimicifugin (rich in plant hormones, regenerate and slow down the ageing process associated with the menopause), pullulan (regenerates and moisturises the skin), tocotrienols (protect the skin from the destructive effects of free radicals and photoaging).

### Properties:

- increases the synthesis of collagen, elastin and glycosaminoglycans (polysaccharides also known as mucopolysaccharides, and are found in connective tissue; together with collagen and elastin they form structures known as proteoglycans which determine the firmness of connective tissue)
- reduces and gradually smoothes fine lines and wrinkles
- regenerates, moisturises and firms
- leaves the skin firm and tight.

30 ml

Dermatologically tested.  
For professional use only.

**Ingredients:** Aqua, Glycerin, Pentylene Glycol, Propylene Glycol, Pullulan, Cimicifuga Racemosa Root Ext., Dioscorea Root Ext., Palmitoyl Tripeptide-5, Palmitoyl Dipeptide-5 Diaminobutyroyl Hydroxythreonine, Palmitoyl Dipeptide-5 Diaminohydroxybutyrate, Tocotrienols, Sodium Acrylate/Sodium Acryloyldimethyl Taurate Copolymer, Isohexadecane, Polysorbate 80, Polysorbate 20, Vitis Vinifera Seed Oil.

**Meso**  
cosmetics

**06A**

**Hyaluronic  
Moisturizing  
Mask**

A mask with a light, creamy and a smooth velvety texture for dry and dehydrated skin types. It provides deep and long-lasting moisture, soothes dryness and eliminates flaking of the skin. This mask also reduces irritation, smoothes superficial wrinkles resulting from dehydration, regenerates damaged skin and keeps skin hydrated for a long period. The mask contains the moisturizing complex Hydroviton®PLUS (sodium hyaluronate, NMF components - urea, sodium PCA, sodium lactate, and saccharides), plant ceramides, allantoin, panthenol, vitamin E.

**Meso**  
cosmetics

**06B**

**Soothing  
and Calming  
Mask**

A light gel mask to be used after microneedle mesotherapy, acid exfoliation treatments and excessive sun exposure. It is ideally suited for all skin types, even sensitive and allergic skin conditions. Its active ingredients effectively minimize and soothe irritation and redness of the skin. The unique formula reduces the feeling of warmth associated with acid exfoliation. The mask deeply moisturizes, brightens, soothes and relaxes the skin. It brings immediate relief and gives a pleasant cooling sensation. The mask contains:

- astragalus root extract – moisturizes, soothes and strengthens the skin's protective process
- aloe extract (a source of vitamin B1, B2, B3, B12, C and E, aminoacids, PUFAs and mucopolysaccharides) – stimulating immunological system that has a soothing and healing effect
- panthenol and allantoin – regenerate the skin and have a soothing and anti-inflammatory effect.

**Meso**  
cosmetics

**06C**

**Couperose  
Skin  
Tonic**

A creamy mask for sensitive dry and combination skin which is prone to capillary problems, angioneurosis and rosacea. It effectively reduces skin redness and strengthens capillary contraction and dilation. It reduces swelling as well as lightens and soothes the skin. It moisturizes the skin intensely and rebuilds the epidermal hydrolipid film, eliminating skin dryness and the itching and stretching sensation. The mask contains:

- arnica montana extract and rutin – strengthen capillaries and reduces their permeability; it has an antiinflammatory and anti-swelling effect
- liquorice root and hamamelis extracts – have an antiinflammatory, soothing and calming effect on the irritated and reddened skin
- panthenol – regenerates the skin and relieves irritations.

**Wrinkle  
Lifting  
Mask**

A rich creamy mask for mature dry and combination skin with redness and temperature sensitivity. It intensely relaxes the skin and strengthens capillary contraction and dilation. It moisturizes and smoothes out the skin. It soothes the skin and gives a luminating effect. It reduces swelling and inflammation. The mask contains:

- white tea extract – one of the most potent antioxidants, protects the skin from free radicals and photoaging, has an anti-aging effect
- liquorice and hamamelis extracts – have an antiinflammatory and soothing effect on irritated and red skin
- rutin – strengthens capillaries and reduces permeability of vascular walls
- vitamins A and E – regenerate the skin and prevent photoaging
- allantoin and d-panthenol – soothe and regenerate the skin.

200 ml

**Wrinkle  
Lifting Serum  
with amino  
peptides**

A gentle protective cream with UVA/UVB SPF 30 sunscreen. Its formula is based on safe and photostable sun filters that ensure a high level of protection from the harmful UVA and UVB rays. The product effectively protects the skin from photoaging and hyperpigmentation, as well as providing essential protection following professional skin exfoliation with acids (almond, glycolic, pyruvic). The cream's protective action is enhanced by antioxidants which neutralize free radicals. The cream leaves the skin moisturized, smooth, soft and elastic. The cream contains:

- UVA and UVB mineral and chemical filters – a complex of screening substances that are well accepted by the skin
- vitamins C and E – antioxidants that protect the skin against free radicals, premature aging, regenerate the skin and strengthen the epidermal barrier; a stable form of vitamin C (ascorbyl glucoside) additionally stimulates collagen synthesis and lightens the complexion.

Meso  
cosmetics

## Instructions for use

1. Saturate some cosmetic pads with Eye Makeup Remover Eye and place them on the eyelids for 15 seconds. Then cleanse makeup around the eyes with them.
2. Spread a small amount of Make-up Remover for Sensitive Skin Cleansing Gel on the pre-wetted skin of the face, neck and shoulders, and then carefully rub using spherical motions to obtain a foam. Then cleanse with a damp fleece towel and dry.
3. Saturate some cosmetic pads with Sensitive Skin Tonic and wipe the skin with them.
4. Apply a thin layer of AHA Peeling to the skin and leave for 10 minutes. Then wash with copious quantities of water and dry the skin. Wipe the skin with swabs saturated with Sensitive Skin Tonic.
5. Apply the selected BIODERMALOGIC serum directly to the skin. Never perform this treatment when the skin is dry.
6. Fill the cartridge with the selected BIODERMALOGIC serum.
7. Start the procedure by holding the handle of the cartridge vertically (80-100 impressions / second). Stretch the skin lightly with your fingers to get a uniform effect.
8. Leave the serum on the face for a few minutes until it is absorbed.
9. Apply a covering layer of mask cream.
10. Next, prepare and apply an algae mask. To 4 measures (50 m) of alginate, add 2 measures of cold water and 2 measures of Activating Concentrate. Stir vigorously. Apply directly to the skin of the face and neck or on a gauze moistened with Activating Concentrate. Leave the mask on for 15-20 minutes.
11. After 15-20 minutes, remove the mask, gently prying it off and wiping the skin with cosmetic pads soaked with Sensitive Skin Tonic.
12. At the end of each treatment, apply SPF 30 After Care Cream (by gently patting, not rubbing). Should the skin become very red, or light bleeding occur, during the treatment, the speed of the impressions speed and the pressure of the cartridge should be reduced. Never set too high a pressure of the cartridge on the skin.

We recommend using a treatment regime of of six to eight sessions (one or two sessions per week). The break between the each series of sessions should be at least four weeks.
